

Report on Exchange Meeting with East Asian Countries (2014-2017)

Message from the President of Japanese Association of Occupational Therapists

Japanese Association of Occupational Therapists (JAOT) hosted the 1st Luncheon with East Asian Countries in the 16th International Congress of the World Federation of Occupational Therapists in Yokohama in 2014. At the meeting, JAOT proposed the plan to keep holding the meeting on a regular basis, and the plan was agreed by representatives from South Korea, Taiwan, Hong Kong, Philippines and Singapore.

Following the success of the luncheon meeting, the series of Exchange Meeting with East Asian Countries was organized in 2015 (Kobe), 2016 (Sapporo) and 2017 (Tokyo).

The purpose of the meetings was to know the current state, challenges and opportunities in OT each other, and also strengthen our relationship. Through these meetings, I believe we have developed our shared understanding of our roles of OT in Asia, education and training system of each country. Actually we have also achieved more than just sharing ideas. A bilateral collaboration was already launched, and also future collaborations in practice, education and research areas are highly expected.

There will be issues on the venue and the holding period in the future, but the continuation of the meetings to be confirmed, and we would like to promote further exchanges with each country.

Finally, we would like to thank for those who have cooperated with us in organizing the meetings and all your contributions so far.

Mr. Haruki Nakamura

President

Japanese Association of Occupational Therapists

Message from the Director of the International Section, JAOT

During the 16th International Congress of the World Federation of Occupational Therapists held in Yokohama in 2014, JAOT started active interchange with occupational therapist associations of several neighboring countries.

This project was undertaken to support cooperation among the occupational therapist associations (OTAs) of South Korea, Taiwan, Hong Kong, Philippines, Singapore, and Japan. At the first meeting in Yokohama in 2014, the respective associations were introduced. Then we discussed themes for discussion for these six OTAs. At the second meeting in Kobe in 2015, we presented work and tasks of the respective OTAs, and discussed ideas for solution. At the third meeting in Sapporo in 2016, we introduced arts and science systems of the respective OTAs. Then we grouped for interchange of arts and sciences with the respective OTAs. At the fourth meeting in Tokyo in 2017, we presented education systems of the respective OTAs in conjunction with the occupational therapy (OT) education system the respective countries. This meeting revealed the expansive OT needs of these countries, and subsidiary needs. Through the four meetings, we identified similarities and differences of work and tasks of the six OTAs. Additionally, we built a basis to support cooperation in the near future.

Japan's aging society has progressed far beyond those of other countries. For all of Japan, dementia, musculoskeletal ambulation disability symptoms, and others of elderly people pose severe difficulties. Along with difficulties confronted by elderly people, Japan requires measures for people with mental and developmental difficulties. Especially, some means are necessary to help people set to work and have a social life.

JAOT is working on these tasks using Management Tools for Daily Life Performance. Furthermore, we develop unexplored territory of Japanese occupational therapists. We earnestly hope that this report will be as useful for all Asian occupational therapists as they have been for the six OTAs.

Best regards,

Dr. Hiromi Fujii

Director, International Section, JAOT

Japanese Association of Occupational Therapists

Luncheon with East Asian Countries
Proceedings

【Date】 June 19, 2014 (Thursday) 12 : 00～13 : 00

【Participants】 (titles omitted)

Japan : Haruki Nakamura, Junichi Shimizu, Hiroshi Yamane, Masayoshi Kobayashi,
Daisuke Jinnai, Hiromi Fujii, Yasuhito Sengoku, Yoshihisa Sato, Noriko
Tomioka, Fusae Ishibashi, Setsuko Yamasaki

Taiwan (R.O.C) : Ms. Ling Hui Chang, Ms. Ying Chung Chou

South Korea : Dr. Byoung-Jin Jeon, Ms. Eun-Young Yoo

Singapore : Ms. Florence Cheong, Dr. Lim Hua Beng

Philippines : Dr. Anthony S Grecia

【Absent】

Hong Kong : Dr. Kenneth N. K. FONG

【Agenda】

1. Greetings and Self-introduction

Haruki Nakamura, JAOT President made the opening greetings and expressed his intention to hold this meeting once a year from this time forward on a continuous basis and make this meeting as a kick-start to deepen the exchanges among the associations in Asian countries.

2. Concerning the International Symposium

Junichi Shimizu, the Vice President of JAOT told that JAOT is wishing to make this meeting as the opportunity to promote international exchanges of OTs in both academic and educational basis. He also explained about the International Symposium which is held annually in the national conference of JAOT and one presenter from each country will be invited to make a presentation at the symposium hereafter. In line with this, he asked the attendees from abroad for help to nominate the presenter who can make a presentation at the symposium.

3. Concerning the Asian Journal of Occupational Therapy①

Masayoshi Kobayashi, the Scientific Committee Manager introduced the Japanese Occupational Therapy Congress & Expo which is held annually explaining that it became possible for foreign applicants to register the 49th Japanese Occupational Therapy Congress and Expo which will be held in Kobe in 2015 and the next national conference which will be held in Hokkaido in 2016. He also asked the attendants to consider about the registration to these Congresses.

4. Concerning the Asian Journal of Occupational Therapy②

Yasuhito Sengoku, the Chief of the Asian Journal of Occupational Therapy Editing Committee explained about the outline of the journal and manuscript submission rules.

- Question from Singapore : Requested the detailed explanation about the manuscript rules including the submission period.
- Question from Taiwan : Asked whether they have the rules about quotation or not.
- Question from Philippines : Asked about the list of the reviewers how they were selected.

→Mr. Sengoku answered that he is recruiting the reviewer who is like the person listed on the international journal. His committee needs more than one reviewer from each countries. Taking this meeting as the opportunity for nominate reviewers from the participant's countries.

5. Concerning the Education for Occupational Therapists

Daisuke Jinnai, the Education Department Manager introduced the transition of Japanese occupational therapists which is stated on the page 12 on JAOT brochure, explaining that the main characteristic of the the Japanese occupational therapist population is that about 80% of it is consisted of young generation. He also explained about the current situation of each qualification acquisition including post-qualification education system, authorized occupational therapist, specialized occupational therapist, and/or other qualifications.

※The report and explanation from each countries about this issue are the followings:

- Opinion from Singapore : Complimented the JAOT educational system as wonderful, and mentioned that Asian countries need to learn from this system and set it as a model. Singapore also has the recognition system as well, but not as well-organized as Japanese system.
- Opinion from Philippines : Explained that Philippines is creating the educational system currently. Under such a circumstance, they mentioned that they would be happy if they could go ahead with creating system by cooperating with JAOT and other countries and learning from them.
- Opinion from Singapore : Mentioned the current situation of OT in Singapore that OT is also less-noted than PT in their country. Under such circumstance, they think that the promotion of the educational system for master and doctor is necessary. It is well-developed in Australia, but in terms of the entire Asian development, we need to create such system by cooperating each other.
- Question from Singapore : How JAOT classify the areas of experts of OT in concrete?
→Daisuke Jinnai explained about the four specialities and seven areas for four areas of speciality and/or seven specialities for specialized occupational therapist.
- Opinion from South Korea : Explained 10 types of educational program are provided in South Korea and all of them put a high value on the community-based programs.
- Opinion from Philippines : Explained that the classification by speciality is being promoted in Philippines. The percentage of pediatrics is high by ratio, but they are also creating the programs for disaster-preparedness.
- Opinion from Taiwan : Insisted that how to make a classification of speciality varies by the university level or hospital clinics in each country in Asian region. If Asian countries cooperate to create educational programs, they need to make programs based on the big theme such as "dementia". Taking this meeting as an opportunity, they suggested the participants to set out a core theme.

- Opinion from Singapore : Agreed with the opinion of Taiwan. They suggested to develop programs by separating into the area requires high speciality or not.
- Opinion from Philippines : Also agreed with the opinion of Taiwan. They also suggested to make a core theme and to make programs based on the theme for five-year span.
- Opinion from Haruki Nakamura : Told that he was happy to know the current situation of each countries. He also explained the current situation of Japan that they are trying to make the system which can be recognized by the government, but it's difficult to get the recognition by the OT alone, so they are making approach to the government by cooperating with PT and ST to make one cooperative organization. He told the approaches toward the disaster preparedness of Philippines became very informative guide. In Japan, the doctor and nurse are considered to be worth investing a great deal of money to training system, so they want make OT to achieve the same status. Therefore, he considers it's necessary for them to cooperate with Asian countries to make one certain theme for the improvement of OT's position in the society.
- Question from Taiwan : Have one question whether they can consider this meeting as the gathering belongs to WFOT or not?
→Haruki Nakamura answered that this meeting doesn't belong to WFOT. He asked the participants to recognize this meeting as the gathering among the associations of each countries.

6. Concerning the Future Plan

Haruki Nakamura, the JAOT President explained about his intention to continue holding this meeting regularly. He also proposed the participants to hold this meeting once a year basis from now on and told that he will let the JAOT to prepare the draft for the regular meeting.

→All the participants from South Korea, Singapore, Taiwan and Philippines agreed to this proposal.

2. The second Exchange Meeting with East Asian Countries

General Information of “The 2nd Exchange Meeting with East Asian Countries”

Date : June 18, 2015 (Thu.) : 16:00-18:00

Venue : Hyogo University of Health Sciences

Meeting Room M487

Address: 1-3-6 Minatojima Chu-ku, Kobe-shi, Hyogo 650-8530, Japan

Management tool for daily life performance™

A total of 230 subjects participated in a randomized controlled trial (RCT). The group that performed the MTDLP intervention maintained their Quality of life (QOL) one year after intervention, whereas QOL gradually declined in the control group. The incremental cost effectiveness ratio (ICER) was 23,000 yen/quality-adjusted life year (QALY), indicating sufficient cost effectiveness.

A Presentation on Occupational Therapy Services in Hong Kong – An Update

Mr. Samuel Chan
Chairperson
HKOTA

**On Behalf of Hong Kong
Occupational Therapy Association,
I thank you for
Japanese Association of
Occupational Therapists’
kind invitation**

Key Milestones in Hong Kong’s OT History

- * OT Service started since 40’s – A handicraft instructor employed to work in a Mental Hospital in 1949
- * The first formal OT service established in a major hospital in 1953
- * The first OT school in operation in 1978; 43 OT graduated in 1981
- * Hong Kong Occupational Therapy Association (HKOTA) was founded also in 1978; Its former name was Hong Kong Association of Occupational Therapists (HKAOT) which started with 40 members only at that time

Key Milestones in Hong Kong’s OT History

- * HKAOT was officially accepted as a member of WFOT in 1984
- * 1985 saw the publication of ‘Journal of Hong Kong Association of Occupational Therapists’, later re-named ‘Hong Kong Journal of Occupational Therapy’ in 1993; it is now indexed in SCI-E with an Impact Factor of 0.652 according to Thomson Reuters’ 2013 data
- * Starting from 1990, OT practitioners in Hong Kong were required to register with the ‘OT Board, Hong Kong’ if they intended to practise the profession legally

Key Milestones in Hong Kong's OT History

- * 1992 saw the establishment of the Hospital Authority in Hong Kong, that took over the management and administration of all public-funded hospitals
- * The first Master OT program was launched by the Hong Kong Polytechnic University in 1996
- * The first Master entry OT program was launched also by the Hong Kong Polytechnic University in 2012
- * The second Bachelor Degree (Hons.) in OT program was launched by the Tung Wah College in 2013; hence there exist 2 OT schools operating BSc programs in Hong Kong now

Development of the OT Profession in Hong Kong

- * Occupational Therapy in Hong Kong has undergone significant development in many different sectors over the past 65 years
- * OT emerging into newer frontiers including Housing, Examination Adjustment for high schoolers, Alternative Therapy (Bowen Therapy), Case Management (integrative one stop services) of community dwellers with mental illness and of workers suffering from work injuries, Promotion of Wellness (Disease Prevention) through practice of Chinese Traditional Qi Gong, etc.

Development of the OT Profession in Hong Kong

- * The latest manpower survey by the Hong Kong's Department of Health in 2011 indicated that:
- * 1. About 48.2% occupational therapists were employed by the Hospital Authority
- * 2. Around 33.6% working in the Non-Government Organizations (NGO)
- * 3. Only 8.6% practising in private market
- * 4. Minorities are: 5.7% employed by academic Institutions and 3.8% by Government Departments like Department of Health, Social Welfare Department, etc.

Development of the OT Profession in Hong Kong

- * The Hong Kong Occupational Therapists are relatively young with median age of 36
- * In general, a master degree qualification is a pre-requisite for consideration for promotion to a higher rank
- * Since 2009, there has been a severe shortage of OT manpower in the market, with many unfilled vacancies in both the Hospital Authority and the NGOs

Development of the OT Profession in Hong Kong

- * On the other hand, the demand on OT Service is increasing because of:
 - * 1. The aging population
 - * 2. An advocated focus on the enhancement of quality of life of the disabled by healthcare practitioners
 - * 3. A growing need for rehabilitation from the community with a better knowledge about OT

Development of the OT Profession in Hong Kong

- * Yet, OT manpower supply is going to improve because:
 - * 1. The second Master Entry OT Program will complete soon in 2016
 - * 2. The second Occupational Therapy Program launched by Tung Wah College was already in operation in 2012 & 2013 respectively
 - * 3. In addition, there has been a marked increase in undergraduate admissions to the Hong Kong Polytechnic University from 45 to 90 per year starting from 2012
 - * As a result, there will be over 130 Occupational Therapy graduates joining the workforce each year starting from 2017

Development of the OT Profession in Hong Kong

- * The practice of OT in Hong Kong also has shown great changes throughout past 65 years:

Old Practice	New Practice
Discrete physical & mental health practice	Combination of both physical and psychosocial practice
Skill and technique based	Knowledge and evidence based
Treatment and rehabilitation	Including disease prevention
High quantity to cope with the demand	High touch and personalized
Focus on OT service	Providing case management

OT Governing Mechanism in Hong Kong

- * Legal System: Registration through the Occupational Therapists' Board, Hong Kong
 - * OT Practitioners need a Practising Certificate to legally practise the profession
 - * Practising Certificate is to be renewed once a year
- * Civil Society's Influence (non-governmental system):
 - * Both the "Hong Kong Occupational Therapy Association" and the "Coordinating Committee in Occupational Therapy" in the 'Hospital Authority' have been playing an important and leading role in the self-control of OT in Hong Kong
 - * They have been investing much effort in setting service standards, guiding therapists in the provision of service
 - * To uplift OTs' clinical competence, HKOTA published a wide variety of publications in the past years on different areas of practice such as stroke, paediatric, dementia care, work rehabilitation and mental health service, etc.

Investments of HKOTA – Contributions to the OT Profession

- * The Hong Kong Occupational Therapy Association has invested much resource in the public education on Occupational Therapy – PUBLICITY
- * Since 2011, there was an annual "World OT Day" event, involving nearly 100 therapists and students as volunteers, with game booths for the public to understand OT in various specialties – PUBLICITY
- * The Hong Kong Polytechnic University students also started the same promotion activity in the university campus recently and it will also become an annual event – NETWORKING
- * There was annual radio program series on OT broadcasted since 2013 – PUBLICITY
- * The association ensures that the OT voice will be heard in policy consultation on an array of areas of public administration such as health care policy, health care service planning and barrier free access for people with disability – HEALTH PROMOTION
- * There were close connections between the Association and other professional groups and patient groups with OT supporting their groups' activity including conference, joint press conference and health promotional events – HEALTH PROMOTION
- * Publications produced by HKOTA – PROFESSIONAL DEVELOPMENT

SUCCESS FACTORS

- * Occupational Therapy development in Hong Kong is deemed healthy and successful. Looking back, there were five key factors for the success:
 1. understanding the needs of the clients
 2. working and learning diligently to satisfy their needs
 3. connecting with the stakeholders
 4. on-going training and development
 5. leadership of one and only one territory-wide OT professional association
- * Above all, upholding the core value of OT – "all our clients shall lead a meaningful life of their choice" and sharing of this value with the community at large drove Hong Kong OTs forward

CHALLENGES AHEAD

- * 1. OT was a relatively new concept in Chinese population, which was imported from Western World; causing misunderstanding of customers about the nature of OT
- * 2. Demand posed upon HKOTA by both OTs and the General Public keeps increasing while on the other hand the Association's network keeps enlarging; leading to our Voluntary Executives' inefficiency in coping with these demands

CHALLENGES AHEAD

- * 3. Hong Kong OTs are facing a need for specialization; pressurizing them to pursue an incessantly life-long professional development
- * 4. Shortage of teaching manpower in the OT educational institutes; constraining the teachers in taking good care for the students
- * 5. In general, shortage of OT practitioners in the society to render services to customers

CHALLENGES AHEAD

- * 6. Significant Increase in number of intake of female OT students (Ratio of male to female OT student intake is preferably 1:1 because the profession needs the different but distinctive contributions of both sexes)
- * 7. Regression in clinical skills induction in the educational institutes because apprenticeship mode of education in schools has been foregone; demanding HKOTA to do more skill training courses for on-field OTs

THE END

**OCCUPATIONAL
THERAPY ASSOCIATION**
of the PHILIPPINES, Inc.

**THE PHILIPPINE OT PRACTICE: A
REFLECTION OF COLLABORATIVE AND
TRANSFORMATIVE RESPONSES TO
NATIONAL HEALTHCARE AGENDA, GLOBAL
COMPETITIVENESS & MARKET DEMANDS**

Presented by:
Anthony S. Grecia, PhD Cand., MA, OTR, OTRP
President, OT Association of the Philippines

Current Profile of Philippine OT Practitioners

- 3123 registered and licensed OTs
- 286 members of the association (250-350 renewal rate of membership per year)
- 6 good and performing Schools/ universities offering a 5 year OT baccalaureate program
- 3 additional OT schools can potentially perform well by 2016
- There is increasing enrollment trend in all schools in the past 3 years
- There are about 100-120 new OT professionals per year
- Current ratio of OT professional to the population is 0.3 per 10,000 Filipinos

1. The current population trend dictates the need and emphasis of OT Practice

Philippines 2015
Population: 101.802.000

- Very strong OT Pediatric practice with 33.4% of the population within 0-14 years old
- Emerging trend in adolescent practice and transitioning programs with 19.6% of the population within 15-24 years old
- Geriatric OT practice is at its infancy with 6.7% of the population within 60-84 years old

The pyramid has been relatively stable from 2005 and possibly until 2025

2. The OT Tripartite of Governing Bodies/Institution greatly influence OT Education & curriculum, and consequently the practice patterns

OT Association of the Philippines

- Continuous provision of seminars and workshops to update practice patterns
- Accreditation of curriculum of OT schools on behalf of WFOT

Commission on Higher Education, Technical Committee on OT Education

- monitoring and guidance of OT programs to meet Philippine standards

Professional Regulation Commission, OT-PT Regulatory Board

- provision of licensure examination
- implementation of the Continuing Professional Development Program

3. The continuous exodus of Ot-PT professionals (CFO,2006) currently affect the practice patterns such that:

- Majority are young professionals and within early adulthood
- Only a few are senior practitioners and are at middle to late adulthood
- Only a few remained in the country who have graduate studies and are capable of conducting research

4. The increased occurrence of disasters as well as the promotion of inclusive development (in the new CBR matrix) has influenced the practice patterns in dealing with the various Filipino Communities

5. The upcoming opening of market for professional services (including export of occupational therapy services) through ASEAN Mutual Recognition Agreement or MRA as mandated by the government (Brockman, 2012) is starting to influence professionals, including OT practitioners to *“Go local and Think Global”*

Occupational Therapy in
Childhood & Adolescence

Client Group

The top (5) developmental disabilities in the Philippines (Reyes and Herrin, 2009):

- Intellectual Disabilities
- Autism Spectrum Disorder

Philippine OT Practice in
Mental Health

With the exclusion of disaster response, mental health practice is predominantly hospital-based, targeting both in-patients and out-patients with the following top diagnoses:

- Psychotic disorders (Brief Psychotic Disorder, Schizophrenia, Schizophreniform, Schizoaffective, Delusional disorders)
- Mood Disorders (Bipolar I and II, Major Depressive Disorder)
- Anxiety Disorders; Trauma-related disorders (Acute Stress Disorder, Post Traumatic Stress Disorder);
- Substance-related Disorders

Promoting mental health through occupations

Monitoring self-care

Health Maintenance (Yoga)

Sleep Preparation:
Bedside Management

Prevocational Training:
Clerical Work and Use of Computers

Promoting mental health through occupations

Sports and Health Promotion

Leisure and Play

Philippine OT Practice in Geriatrics

Trends & Challenges

- Practice in geriatrics is predominantly hospital-based (rehabilitation departments)
- Other practice settings are in skilled nursing facilities, specialized centers in hospitals (e.g. Memory Center), and home health care.
- Elderly clients are primarily referred for stroke rehabilitation concerns to target Both Upper Extremity dysfunction, dysphagia, and other occupational difficulties.
- Primary challenges: very limited OTs practicing and specializing in geriatrics although there is an increasing number of Filipino elderly; very limited exposure in the curriculum

Emphasis on Active Aging

Aging in Place	Working with Caregivers	Falls Prevention
Low Vision and Safety	Social Participation	Cognitive Rehabilitation
Chronic Disease Management	Wellness and Health Promotion	Dysphagia Care

Filipino Senior Citizens

Philippine Practice in OT Education

Updates from the Top 2 Producers of OTs in the Philippines

- The University of Santo Tomas/UST (College of Rehabilitation Science, OT Dept.) – its academic plan (and curriculum) revolves around four pillars: outcomes, occupation, evidence and internationalization.
- UST's Key response:
 - Offering of Master of Science in Occupational Therapy
 - Aims to be locally responsive and globally competitive
 - Emphasis: Capacity-building of OT faculty

Updates from the Top 2 Producers of OTs in the Philippines

- | | |
|---|--|
| <p>University of the Philippines-Manila/UPM, (College of Allied Medical Professions, Dept. of OT)-its curriculum identified five competencies needed to meet local and international expectations of qualified health care workers:</p> <ul style="list-style-type: none"> • Research-information process • Ethical practice • Professional competence • Reflective practice • Managing self, others and <u>service (local health need)</u> | <p>UPM's Key Responses:</p> <ul style="list-style-type: none"> • Formulation of occupation-based curriculum • Emphasis on Community-Based Rehabilitation, • Formulation of Research Agenda • Plan for Blended-Learning • Plan for OT Graduate Program |
|---|--|

Challenges of OT Practice

- Very low ratio of OT to the population: 0.3 per 10,000
- Unmet high demands on Pediatric OT Practice in the rural areas; proliferation of “pseudo-OTs” or practice of unlicensed professionals
- Lack of OTs in hospital-based facilities due to poor compensation
- Lack of OTs in other practice areas such as geriatrics , mental health, education, and CBR
- Sustainability of disaster response efforts
- Inadequate faculty development plan/program
- Lack of graduate programs and research on OT practice

Future Directions

- Monitoring and implementation of Strategies of the Philippine OT Community in relation to the target goal: **increase the ratio of occupational therapist per 10,000 Filipinos to 0.40-0.50 by the year 2025**
- Continued Offering of continuing professional development and certification courses
- Developmental monitoring and enhancement of the current OT schools (with emphasis on faculty development program and CBR)
- Implementation of Outcome-Based Education Curriculum by 2016
- Formulation of Program Standards and Guidelines for OT Graduate Education

Future Directions

- Provision of Research Agenda for all OT schools related to OT Practice
- Consideration of the need to develop training program and education OT Assistants or OT Technicians
- Development of private out-patient facilities to promote adult mental health and geriatric practice

Perspectives on Occupational Therapy in Singapore

Lim Hua Beng
WFOT Alternate Delegate
Past President

Singapore Association of Occupational Therapists

Singapore Association of Occupational Therapists

- Established with Singapore's Registrar of Society in 11 Jan 1975
- Includes Student Committee who are invited to Council Meetings
- Mission:
Shaping and advancing the quality and access of occupational therapy through standard-setting, advocacy, education and research

Representation

Governmental

- Allied Health Professions Council
 - Council Member (President)
 - Qualifying Examination Panel
- Committee of Allied Health Development, MOH
 - Member
- Agency for Integrated Care
 - Advisor, Community Based Care
- Health Promotion Board
 - Partner, Falls Prevention

Education & Others

- Nanyang Polytechnic Curriculum Advisory Panel
 - Member
- Singapore International Foundation
 - Medan Special School Project, Indonesia
- Chairman, Bi-Annual Occupational Therapy Heads of Department Meeting

Growth of Occupational Therapists

Total Number of Occupational Therapists

Registration Type	Total Number
Full Registration	732
Conditional Registration	170
Restricted Registration	3
Total	905

Country of Basic Qualification	Number of OT
Singapore	499
Australia	101
India	76
Philippines	72
United Kingdom	43
Ireland	29
Taiwan	23
Malaysia	23
Hong Kong	12
Others	27
Total	905

Gender	Number
Male	173
Female	732

Age	Number
20-29	455
30-39	330
40-49	96
50-59	19
60 and above	5

Nationality	Number
Singapore Citizen & PR	675
Non-Citizen	230
Total Number	905

(AHPC, 31 Dec 2014)

National Shortage of Therapists

- OT: 100 000 Population
- 16 : 100 000 (2015)
- 22 : 100 000 (2020)
- Growth of at least 100 OT annually
- Current annual intake of Singapore's one OT school: 65

Projected Number of Occupational Therapists from 2015

Achievement: Registration Act

- **Allows Autonomy of Practice**
 - Governance similar to Medicine, Dentistry
 - Growth of private practice
 - Private Insurance funding
 - Occupational Therapists can release public funding & make referrals for public funded programmes
 - Referral for public funded community sited day rehabilitation programmes/ home rehabilitation
 - Release of funding for Mobility and Assistive Technology Fund
 - Early Intervention Programme
 - EASE: Home Modification Funding

Challenge: Registration Act

- **Governance of Practice**
 - Conditional Supervised Practice
 - 1 Year to achieve competency for residents
 - 2 Years for foreign Occupational Therapists
 - Complaints Committee and Disciplinary Tribunals
 - Availability of senior and experienced occupational therapists to form the disciplinary process

Achievement: Structured Education Development

- **Phase 1 (Nanyang Polytechnic)**
 - 1992 – 2015
 - 3 year Diploma in OT + 1 year with overseas partner university for Bachelors Degree (University of Sydney/ Trinity College Dublin)
- **Phase 2 (Singapore Institute of Technology)**
 - 2016
 - 4 year Bachelor of Science (Hons)(OT)
- **Phase 3**
 - 20XX
 - Post-graduate education

Achievement: Fair Remuneration

- **New Graduate Annual Median Salary:**
 - **S\$48 000**
 - USD 36 000
 - ¥ 4 400 000
- **Revised Career Framework (Public): Three Tracks**
 - **Clinical Specialty**
 - **Administrator**
 - **Education & Research**

Challenges for SAOT

- **Membership**
 - Membership declined following implementation of Registration
- **Leadership & Mentoring**
- **Specialist Registration**
- **Promotion**
- **Regional and International Collaboration**

NATIONAL OCCUPATIONAL THERAPY CONFERENCE 3 – 4 October 2014
Concorde Hotel, Singapore

Moving Towards Occupational Performance & Participation in the Community

Register Now!
Are we missing an important opportunity to understand rehabilitation outcomes?
By Professor Jenny Zhang, The University of Queensland, Australia

Submit Your Abstracts!
Deadline Extended 31 July 2014

Workshops

- Goals setting: How do we engage clients in therapy?
- Foundation Workshop for Occupational Therapists: Caring for People who Display Behavioural & Psychological Symptoms of Dementia
- Powered Mobility Aid for Community Independent Living
- Environmental Modification in Technology

Topics

- Active Ageing in Workplaces
- Assessment Development
- Assistive Technologies
- Cognitive Rehabilitation
- Collaborative Towards Quality Improvement
- Community Re-integration
- Dementia Care
- Ergonomics in Occupational Safety
- Innovation in New Service Development
- Mental Health
- Mentoring, Education in Competency
- Neurological & Physical Rehabilitation
- Occupational Science in Justice
- Poststroke Rehabilitation
- Palliative & End-of-Life Care
- Vocational Rehabilitation
- Sub-specialty Of Big Driving, Sexual Rehabilitation, (C) Cars, Low Vision, etc.)

3. The third Exchange Meeting with East Asian Countries

General Information of
“The 3rd Exchange Meeting with East Asian Countries”

Date : September 8, 2016 (Thu.) : 10:30-16:30

Venue : Royton Sapporo

Address: Nishi 11-Chome, Kita 1 Jo, Chuo-ku, Sapporo, Hokkaido 060-0001, Japan

URL:<http://www.daiwaresort.jp/en/royton/index.html/>

Chair : Hiromi Fujii, Director, International Section of JAOT

Schedule

10:30 Opening remarks

Haruki Nakamura, The President of Japanese Association of Occupational Therapists

11:00 30-minute presentations about the academic activities of occupational therapy in each country

South Korea	Vice President	Dr. Eun-Young Yoo
-------------	----------------	-------------------

Taiwan(ROC)	WFOT delegate	Dr. Ling-hui Chang
-------------	---------------	--------------------

12:00 Lunch

13:00 30-minute presentations about the academic activities of occupational therapy in each country

Hong Kong	Chairperson	Dr. Chan, Yan-chi Samuel
-----------	-------------	--------------------------

Philippines	Vice President	Dr. Anna Recto-Legaspi
-------------	----------------	------------------------

Singapore	WFOT delegate	Mr. Hua Beng Lim
-----------	---------------	------------------

14:30 Afternoon Tea

15:00 Discussions

- 1) The strategies to promote academic exchanges among six countries.
- 2) How can we within the East Asia region overcome the language barriers to effectively promote a knowledge sharing amongst OTs in these countries?
- 3) Educational and Fieldwork Collaboration among member countries
- 4) The brainstorming regarding the next meeting.

16:30 Closing remarks

Hiromi Fujii, Director, International Section of JAOT

A Presentation on
Occupational Therapy Services &
Academic Activities
in Hong Kong – An Update 2016

Samuel Chan
Chairperson
HKOTA

**On Behalf of Hong Kong Occupational
Therapy Association,
I thank you for
Japanese Association of Occupational
Therapists'
kind invitation**

HKOTA's Academic Activities

Symposium Held in 2014

35th Anniversary Half-day Symposium
"Strengthening OT practice to meet future challenges"
(Course Code : HKOTA-O-00-13-029)

*Jointly Organized by: The Hong Kong Occupational Therapy Association Ltd.
Department of Rehabilitation Sciences, the Hong Kong Polytechnic University*

Date: 3rd May 2014 (Sat.)
Time: 2:00 - 5:00 pm
Venue: Room Z2-035, Hong Kong Polytechnic University

Targeted Participants:

All Occupational Therapists *(Please come and join us to share your views on how to strengthen our professional practice and the related training needs so that we can further enhance the Continuing Professional Development provided by HKOTA)*

**35th Anniversary Half-day Symposium
Programme outline**

3rd May 2014 (Sat.)
2:00pm – 5:00 pm
Room Z2-035, Hong Kong Polytechnic University

Time	Programme / Speakers	Specialty/ Service Area:
2:00 – 2:05	Opening Remarks - Rebecca Chan, SOT/ DTRC Organizing Committee, HKOTA 35th Anniversary	
2:05 – 3:00	Sharing session I and Forum discussion - “Manpower need in OT and education” - Dr. Andrew Siu, Associate Professor, HKPU - “Sharing on OT services in elderly service” - Ms. Kaau Wan, Department Manager, MMRC-FYK - “Recovery-oriented practice in mental health” - Ms. Wendy Chan, OTI, CPH	Education & training Convener of Elderly Service Specialty Group, OTCOC Mental Health Service
3:00 – 4:00	Sharing session II and Forum discussion - “Sharing on OT services in O&T” - Mr. Stephen Siu, OTI, QEH - “OT services in Family Medicine & Primary Health Care” - Mr. Thomas Cheung, OTI, FVNEH - “Fascia rehabilitation” - Ms. Selina Wan, Department Manager, KWH	Orthopedic & Traumatology Primary Health Care Bowen Therapy & Fascia Rehab
4:00 – 4:15	Break	
4:15 – 4:55	Sharing session III and Forum discussion - “OT services for Intellectual Disabilities: Review and foresight” - Ms. Allen Lee, OTI, Hong Chi Association - “School based OT and Private Pediatric Services: Opportunities and Challenges” - Ms. Lai Shan Shan, OT in private practice	Services for Intellectual Disabilities School base OT services
4:55 – 5:00	Closing remarks - Mr. Samuel Chan Chairman, HKOTA	

HKOTA's Academic Activities

Accomplishment in 2015-2016

Keyword: Specialty Groups

Specialty Groups

1. Paediatric & Convalescent Service
 - Continue on the development of **Fine Hand Motor Test** which is to be integrated with **Handwriting Speed Test for School Students**
 - Collaborate with HK Paediatric Foundation & The Boys' & Girls' Club Association to organize HK Healthy Children Competition, introducing “ADL March”
 - Setting up of an independent **Hong Kong Sensory Integration Association**, with a close linkage with HKOTA

Specialty Groups

2. Cross-over of ‘**Health Qigong** cum Traditional Racial Sports Research Group’ with ‘Work Rehabilitation & Occupational Health’
 - Training workshop for Construction Site Workers 3rd Batch
3. Montessori Methods for Dementia™ (MMD) / DementiaAbility Methods: The Montessori Way™ (DMMW)
 - 3 workshops held, trained almost 100 DMMW practitioners
 - 2nd batch of ‘trainers’ trained and would have more manpower to help in training to cope with the increasing demand
 - Well established collaboration with DementiaAbility Enterprise Corporation in Canada
 - Opinion on Dementia Policy & Service in HK
4. New Special Interest Group in Housing set up and led by Sabrina (an OT working in Housing sector) with sharing session organized, with close linkage with Architect and Construction industries

Specialty Groups

2. Cross-over of 'Health Qigong cum Traditional Martial Sports Research Group' with 'Work Rehabilitation & Occupational Health'
 - Training workshop for Construction Site Workers 3rd Batch
3. **Montessori Methods for Dementia™ (MMD) / DementiAbility Methods: The Montessori Way™ (DMMW)**
 - 3 workshops held, trained almost 100 DMMW practitioners
 - 2nd batch of 'trainers' trained and would have more manpower to help in training to cope with the increasing demand
 - Well established collaboration with DementiAbility Enterprise Corporation in Canada
 - Opinion on Dementia Policy & Service in HK
4. New Special Interest Group in **Housing** set up and led by Sabrina (an OT working in Housing sector) with sharing session organized, with close linkage with Architect and Construction industries

HKOTA's Educational Activities

Accomplishment in 2015-2016

Establishment of the Hong Kong College of Occupational Therapists

Background

- * This was discussed in 2008, 2010 AGM
- * The survey in 2010 was in favor of setting up of OT College
- * Re-activated again in 2014
- * 2 preliminary meetings for sharing of views
- * Setting up Organization Committee for Provisional HK College of OT in June 2015

Terms of Reference of The Provisional College

1. To establish a communication platform among occupational therapists with similar professional aspirations so as to facilitate research and development in different specialty areas.
2. To promote professional development of occupational therapy in different specialty areas by setting standards and organizing advanced specialty training.
3. To facilitate the public's access to information on registered occupational therapy specialists.

Road Map	
Milestone	Timeline
Organization Committee for Provisional HK College of OT	June 2015
Preliminary Framework for Consultation	July 2015
Paper on formation of HK College of OT	August 2016
Members consultation	August to September 2016
Invitation of Founder Fellows & Establishment of Specialty Colleges & Provisional OT College	Before December 2016
Invitation of Fellow Application from HKOTA members	January 2017
Vetting of Qualification and Interview	Before June 2017
Confer for 1 st Batch of Fellows & Official Establishment of HK College of OT	July 2017 (Next AGM)
Quotable Qualification Application to HK OT Board	July 2017 onwards

OT Education in Hong Kong

- ### Hong Kong's OT Education
- * The first **formal** OT program (in higher diploma level) was launched in 1978 by the Hong Kong Polytechnics
 - * The first Master OT program was launched by the Hong Kong Polytechnic University in 1996
 - * The first **Master Entry** OT program was launched also by the Hong Kong Polytechnic University in 2012, second batch in 2014 and the third batch will commence in January, 2017

Hong Kong's OT Education

- * Today, for the past many consecutive years, the **entry** academic performance of the students admitted to HKPU's OT program has been ranked the 2nd highest among all students applying for entry to HKPU
- * These newly admitted students (high school leavers) in average have attained 29 points in writing HKDSE (Hong Kong Diploma of Secondary Education Examination)
- * In comparison, students admitted to Faculty of Medicine of either Hong Kong University or Chinese University of Hong Kong in average attained 32 DSE points

Hong Kong's OT Education

- * The second Bachelor Degree (Hons.) in OT program was launched by the Tung Wah College in 2013
- * Hence, there exist 2 OT schools operating undergraduate programs in Hong Kong now
- * This second undergraduate OT program was very lately approved by WFOT (in March 2016)

Hong Kong's OT Education

- * The **entry** academic performance of the students admitted to TWC's OT program has been ranked the 1st highest among all students applying for entry to TWC
- * These students in average have attained 20 DSE points

Hong Kong's OT Education

- * The third undergraduate OT program will soon be launched in Fall 2017 by the Open University of Hong Kong in collaboration with University Salford Manchester, UK (in which the OT program had already been approved by WFOT)

Foreseeable Challenges Faced by the OT Sector in Hong Kong

CHALLENGES AHEAD

- * 1. OT as a title (i.e., the name) is difficult for the public to comprehend or to understand because It is a 'philosophy' based title, unlike other professions' titles which carry direct meaning in their names (such as Physical Therapy, Speech Therapy, Music Therapy, etc.)
 - * As a result, HKOTA today is still making more effort to publicize and promote OT to the public
 - * Otherwise, end-users of OT (both referrers and direct customers) will be limited and high-calibre high school students will not be attracted to select OT program

CHALLENGES AHEAD

- * 2. Students with higher entry qualifications may not necessarily be competent OTs
- * 3. Also, there exists a trend of far more female than male students being admitted to OT programs; we need more balanced number of male and female OTs in the clinical field (currently the ratio is 3:7)
- * 4. Shortage of teaching manpower in the OT sector
 - * As a supplementary measure, HKOTA has been actively organizing wide variety of practical clinical skills induction courses or workshops for members to help uplift on-field clinicians' competence

CHALLENGES AHEAD

- * 5. In recent years, because OT manpower supply could not meet service demand for OT, we saw from time to time some OTs working in NGOs, conventionally headed by social workers, experienced pressure from their bosses asking them to teach OT skills to non-OT disciplines
- * 6. On the other hand, on the contrary we also saw some OTs hosting workshops/courses/programs to teach non-OT people OT skills
 - * To address above controversy, HKOTA is taking action to draft a guiding manual to advise OT clinicians what skills they are encouraged to share with other disciplines and what skills they should not share out

The Filipino OT

Philippine Academy of Occupational Therapists, INC.

Ako ay isang OT

Lee Asuncion, OTRP
Filipino Occupational Therapist

"Sinukat ko ang higpit ng paghawak ng kanyang kamay at ipinaliwanag kung paano niya ito magagamit nang mas mabisa at ligtas sa araw-araw na gawain"

"I measured his grip strength and explained how he can efficiently and safely use his grip in daily activities."

The Filipino Occupational Therapist Project

Occupational
Therapists, Inc.

Annual Convention 2014

- Background of Normal Development as a means to Bridge the Gaps in Cerebral Palsy Management
- Taxation for Self – Employed Professionals
- Sensory Integration: Separating the Theory from Myth and Urban Legends

Have you been practicing in pediatrics and dreading getting a client with cerebral palsy? Fear no more...

Certified pediatric occupational practitioners **Christine Montenegro (OT)** and **Arnell Arneson (PT)** will share their tips to make the process of development easier.

Taxation has always been a stressful monthly experience for private and self-employed practitioners. Learn how to process it easily, legally and worry-free.

Tax consultant **Rosemarie Pardo Arneson (PMS, CPA)** will be going on a hand-on mission for self-employed professionals.

Are you ready to respond to the needs of our countrymen beyond clinical work? Uncover a different sense of humanity through domestic operations.

R. Edy Napag Arneson (PMS and Registered OTR) will lead us with the Philippine Occupational Therapy Disaster Preparedness and Response Plan.

The ASEAN market is opening next year. As a Filipino occupational therapist, do you know where you are going? Are you ready to practice ASEAN level?

Commissioner **Angeline T. Chiu Chiu** from the Professional Regulation Commission will talk about ASEAN integration.

Is your OT curriculum in sync with the current program outcomes of CHED? Let us know the latest updates for a faster and easier accreditation.

Technical Committee on OT Education head **John Carlos** will provide educators with the program outcomes straight from the Commission on Higher Education.

Special breakout topics for students

Key professionals in the different practice areas of OT will provide you the latest local trends and interests, and more than enough reasons to stay.

Facilitators: John Paul Mallari, Adelewynne Arneson, Dennis Geronimo, Mike Manzanaga, Commission on Accreditation: April Pardo, Stephanie, Jan Arneson

OTAP Disaster Risk Reduction & Response

THE OTAP GOLDEN SEMINAR/WORKSHOP SERIES

The OTAP Golden Lecture – Workshop Series

The 2nd National Occupational Therapy Disaster Risk Reduction, Response & Management Workshop

December 18-20, 2014
Cebu & Bohol, PHILIPPINES

Given the increasing frequency of disasters (both natural and human-caused) in the country and around the world, occupational therapists, in collaboration with other professionals, need to be equipped with the knowledge and skills to reduce the risk of and respond to disasters. This workshop is both a follow up to and a review of the national occupational therapy Disaster risk reduction, response and management (DRRRM) plan drawn up in 2012. It is a 3-day workshop consisting of discussions and hands-on training facilitated by a team of internationally known occupational therapy experts in the area of DRRRM. Further, participants will have an opportunity to visit and interact with a community in the province of Bohol (in central Philippines) that was devastated by an earthquake and a typhoon. The workshop will provide an avenue for participants to develop a better understanding of and greater capacity to become integral members of a DRRRM team in their respective communities. To facilitate learning, the workshop is limited to 30 participants.

Resource Speakers

Dr. Kit Singchar (Hong Kong)
Dr. Jennifer Creek (United Kingdom)
Mr. Anthony A. Grella (Philippines)
Ms. Penafrañcia E. Ching (Philippines)

Occupational Therapists

Occupational therapists help people of all ages to improve their ability to perform tasks in their daily living and working environments. They work with individuals who have conditions that are physically, developmentally, socially or emotionally disabling. They also help them to develop, recover, or maintain daily living and work skills. Occupational therapists help clients not only to improve their basic motor functions and reasoning abilities, but also to compensate for permanent loss of function.

Tasks include:

- assessing patients or clients to determine the nature of the disorder, illness or problem by questioning, examining and observing
- developing and implementing treatment plans and evaluating and documenting patients' progress through treatment plans
- assessing functional limitations of people resulting from illnesses and disabilities, and providing therapy to enable people to perform their daily activities and occupations
- assessing clients' emotional, psychological, developmental and physical capabilities using clinical observations and standardised tests
- assessing clients' functional potential in their home, leisure, work and school environments and recommending environmental adaptations to maximise their performance

Singapore Association of Occupational Therapists

(Singapore Standards Occupational Classification, 2015)

OT Registration: First time to renew practice certificates

Professional Registration of Occupational Therapists commenced on 1 April 2013

- Two yearly renewal for practicing certificate
 - Currency of Practice
 - Continuing Education
- Creation of complaints committee to address public complaints
- Launch of on-line application
- Launch of public search for OTs

Registration website allows public to search for occupational therapists by region, location or name

Occupational Therapy in Singapore (2015)

Age	%	Gender	%	Nationality	%	Settings	%
20 - 29	46.3	Male	18.9	Singapore/ Resident	77.5	Acute Hospitals	44.6
30 - 39	39.6	Female	81.1	Non-citizen	22.5	Community Hospitals	11.6
40 - 49	11.4					Community Agencies	21.3
50 - 59	2					Private Practices	13.9
60 and above	0.7						
		Registration Type	%	OT Qualifications	%	Academic Institution	1.7

		Conditional	15.5	Australia	11.3	Unemployed	4.1
		Restricted	1.1	India	8.5		
				Others	24.2		

967 Registered Occupational Therapists in Singapore (31 December 2015)
7% annual growth – Highest growth in community sector

Launch of Bachelors with Honours in Occupational Therapy

- September 2016
- First intake in Singapore's newest public university
- 4 years Bachelors degree
- Curriculum designed in Singapore based on 24 years collaborative experience
- Occupation Centric Curriculum
- Occupational Justice
- Global Health
- Team Based Learning

Nanyang Polytechnic OT students with SIT new students together:
Organised by SAOT Student Committee to welcome new students

MOU Signing with Health Promotions Board

- MOU signed with HPB to be Falls Prevention Ambassador
 - Public education programme

FALLS PREVENTION AMONG OLDER ADULTS LIVING IN THE COMMUNITY

HPB-MOH Clinical Practice Guidelines 1/2015

MAY 2015

Attended MAOT's Effort to launch 1st ASEAN OT Conference

12th Malaysia Singapore OT Meeting & Symposium
1st ASEAN OT Conference, 2015

Singapore Association of Occupational Therapists

Pre-Employment Clinical Training (PECT) Fund

- Government provides SGD \$150 / day of clinical fieldwork education to fieldwork centre for each student
- Students are provided SGD \$20 / day of clinical fieldwork to assist in cost of travel/ food
- All clinical fieldwork centres charge for clinical/fieldwork placements
- PECT Fund provided to educational institutions to disburse
- For overseas students on placements, charge will be levied
 - Educational principles will disburse fund based on reciprocal arrangement

Singapore Association of Occupational Therapists

Challenges

- **Increasing membership beyond the 50% of registered OT**
 - Finding volunteers to represent SAOT at various platforms
- **Leadership renewal**
 - Organisation versus Association
 - Leadership of Special Interest Groups
- **Qualification framework to match Career Framework**
 - No international consistency in post-graduate courses
- **Developing expertise in supervision and mentoring**
 - Students
 - Conditional Registrants
 - Senior Therapists
 - Leaders

Singapore Association of Occupational Therapists

4. The fourth Exchange Meeting with East Asian Countries

General Information of
“The 4th Exchange Meeting with East Asian Countries”

Date : September 21, 2017 (Thu.) : 10:30-16:30

Venue : G402, G Block, Tokyo International Forum

Address: Marunouchi 3-Chome 5-1, Chiyoda-ku, Tokyo, 100-0005, Japan

URL: <https://www.t-i-forum.co.jp/>

Chair : Director, International Section of JAOT

Schedule

10:30 Opening remarks

Haruki Nakamura, The President of Japanese Association of Occupational Therapists

11:00 30-minute presentations in terms of professional OT education from entry level to continuing education in each country, including the fieldwork or Clinical training of OT students

South Korea	Director of Public Relations	Ms. Seokyeon Ji
Taiwan (ROC)	WFOT delegate	Dr. Ling-hui Chang

12:00 Lunch

13:00

Hong Kong	President	Dr. Samuel Chan Yan-chi
Philippines	Vice President	Ms. Anna Recto-Legaspi
Singapore	WFOT delegate 2nd alternate	Dr. Lim Hua Beng

14:30 Afternoon Tea

15:00 Discussions

- 1) Direction for future Exchange Meeting with East Asian Countries
 - i) Continue the meeting or not
 - ii) If continue: When continue, how, Budget, Frequency, Management, etc.
 - iii) Or modify the meeting style, for example: JAOT would like to propose offering the “free” exhibition booth to the group OT associations during the JAOT annual Congresses and Expo. In and out of the booth and/or use the booth as a platform, we may be able to discuss any topic or concerns. It could start from 2018.
- 2) Report on the Exchange Meetings with East Asian Countries

16:30 Closing remarks

International Section of JAOT

Education activities of JAOT

The 4th Exchange Meeting With East Asian Countries : EMEAC
September 21, 2017 (Tokyo)

Daisuke JINNAI, Executive Director
Education Department Manager
The Japanese Association of Occupational Therapists

Change of Occupational Therapist Education

Change of JAOT membership

(White Paper 2015)

The Number of Japanese OT: N=84,947(2017.5.1)
 Member of JAOT: N=56,802(2017.5.1)

Age-distribution of JAOT membership

(White Paper 2015)

Topic of Occupational therapist education

The quality guarantee of the occupational therapists education

○ Revise of PTOT educational designation regulation

- Supply and demand planning for Occupational therapist
- The Obligationization of a third party evaluation

The quality guarantee of the clinical fieldwork education

○ Question and answer of a PTOT clinical fieldwork problem in the Diet

- Consideration of a clinical fieldwork guideline and sharing test

The role of being purchased

- JAPAN VISION HEALTH CARE 2035 The quality from the amount
- Comprehensive community care system
- Corresponding to a difficult case , Management skills ,
- Multi-disciplinary collaboration , Home health care ,Dementia

The complication tendency of the education course

- Setting of new type of course and school
- Vocational practice course, Professional university

Occupational therapist education school designation regulation Amendment proposal

	The present	Amendment proposal
Term of study	More than 3 years	More than 3 years
Curriculum	Establishment of Occupational Therapy management science	
Clinical Fieldwork	18units	22units
Total number of units	93units	101units
The number of teachers	6 people	6 people
Teacher qualification	More than 5 years	More than 5 years +Designation training
Clinical fieldwork leader	More than 3 years	More than 5 years +Designation training
Third person evaluation	—	Every 7 years Publication of a result
Others	Term of study: Studied in conjunction with other professions	

Outline of designation regulations of OT in Japan

1967	Lecture 1,530 h Practice 90 h Fieldwork 1,680 h Total 3,300 h	⇒	Lecture 1,440 h Practice 1,080 h Fieldwork 1,080 h Total 2,700 h
1989	Lecture 1,440 h Practice 1,080 h Fieldwork 1,080 h Total 2,700 h	⇒	Lecture 1,425 h Practice 585 h Fieldwork 810 h elective subjects 200 h Total 3,020 h
1999	Lecture 1,425 h Practice 585 h Fieldwork 810 h elective subjects 200 h Total 3,020 h	⇒	Lecture 75 credits Fieldwork 18 credits Total 93 credits

The post-qualification education system

Background

- The post-qualification education system was established in 2003 by the Japanese Association of Occupational Therapists (JAOT).
- This aims to promote ongoing education to improve the level of care in occupational therapy.
- I will discuss the progress of this system over the past ten years and its current state

The post-qualification education system consists of three parts, basic training, JAOT 'authorized' certification and JAOT specialist certification.

Basic training system

What is Basic training ?...

- Learning fundamental and common value in OT
- Learning basis of clinical practices
- Understanding significance and direction of continuous education
- Understanding theory and state of art of practices in several areas

There are two obligatory trainings, selective training (portfolio).

JAOT Authorized OT Certification

What is Authorized Occupational Therapist?...

An authorized occupational therapist has achieved competencies for certification set by JAOT.

These competencies are focused on clinical practice, field work education, clinical research and management.

Requirements for Certification

1. Undertaking **compulsory training in 3 areas**
(Education, Research, Management)
2. Undertaking **elective training in 2 areas**
(Physical Dysfunction, Psychiatric, Development, Elder, etc)
3. Registration of **3 OT case studies**

JAOT 'Authorized' Certification

- Increases by 100 members annually
- The current total is **906** members (2017)
 - Initial - 580
 - Update - 326

JAOT specialist certification

What is Specialized Occupational Therapist?...

A specialized occupational therapist has achieved competencies set by JAOT demonstrating specialized OT skills in a clinical setting.

Requirements for Specialized Certification

1. Authorized occupational therapist
2. Demonstration of four competencies in a specialized field (i.e., training practices, clinical practices, research practices, practices of education and contribution)
3. Formal examination in each specialized fields

JAOT specialist certification

96 members certified across seven fields of specialization.

Specialized fields

Field	Start	General outline
Dementia	2009	OT for patient with dementia
Hand Surgery	2009	OT for hand function post-surgery
Assistive Technology	2009	OT practices with assistive technology
Special Need Education	2010	OT practices in special needs education setting
Higher Brain Function	2010	OT for patient with higher brain dysfunction
Acute Psychiatry	2011	OT practices in acute psychiatry
Dysphagia	2012	OT for disabilities associated eating function
Visiting OT	2015	OT at Home setting and CBR
Cancer	2016	OT for patient with cancer

The JAOT Post-qualification Education System from 2003 to 2013

- 2003 Establishment of **the post-qualification education system** in JAOT
- 2008 General reform undertaken (basic training system, etc.)
- 2013 2nd General reform undertaken

▼ Establishment of 'certification' framework

- 2004 ~ Authorized occupational therapist certification
- 2009 ~ Specialized occupational therapist certification
- 2013 ~ Formal examinations added for certification

Certification and accreditation systems are a must to ensure quality care. The JOAT continuous education system was established 10 years ago in order to improve the quality of occupational therapy and to promote the development of therapists.

Qualification frameworks are essential in gaining the trust of the public.

Conclusion

- Ongoing reform of certifications is essential
- Future tasks for JAOT ongoing education include:
 1. Increase
Authorized Occupational Therapist certificate members
 2. Increase
Specialized Occupational Therapist certificate members
 3. Expand
specialized Occupational Therapist's field
 4. Promote increased awareness

Thank you for your attention !

Occupational Therapy in Taiwan

Ling-Hui Chang, OTR, Ph.D.
President, Taiwan Occupational Therapy Association
East Asia Occupational Therapy Exchange Meeting
October 20, 2017 Tokyo, Japan Hosted by JAOT

1

History of occupational therapy in Taiwan

1945-1949

- Aides in hospitals to teach mental patients about handicrafts activities.

1956

- Occupational therapist from the International Women's League of Freedom and Peace (國際婦女會), Mrs. Owens helped set up an occupational therapy (作業治療) program in department of psychiatry in Taiwan University Hospital

2

History of occupational therapy in Taiwan

1966

- Cheng-Hsin General Hospital recruited 5 members for one-year OT (作業治療) training with the support from the faculty of National Defense Medical Center & Department of Industrial Education, National Taiwan Normal University

1967

- Department of Rehabilitation in Taiwan University Hospital started to provide OT (作業治療) service, with the support of Huang, Yen-Ching OT and two OTs by WHO

1969

- Cheng-Hsin General Hospital established a OT (作業治療) program. Recruited 5 members for two-year OT (作業治療) training

3

History of occupational therapy in Taiwan

1970

- The first 4-year occupational therapy educational program in Taiwan by College of Medicine, National Taiwan University,, established occupational therapy as a division of the Department of Physical Medicine and Rehabilitation till 1992
- Name change: 作業治療 to 職能治療 (Occupational Therapy)

4

History of occupational therapy in Taiwan

- 1982 R.O.C. occupational therapy Association (Now Taiwan occupational therapy association) established
- 1986 Taiwan became a member organization of World Federation of Occupational Therapists(WFOT)
- 1997 Occupational Therapists Act
- 1998 Occupational therapist license examination
- 2001 The Union of Occupational Therapists, ROC

5

Yearly Enrollment of Bachelor's Student & Junior College's Student in OT

Establishment of Graduate Program & Doctoral Program

	Enrollment in 2016	number of graduates(2008)
master program	National Taiwan University	10
	National Chang Gung University	4
	Kaohsiung Medical University	4
	National Cheng Kung University	7
	total	25
doctoral program	National Chang Gung University	3
	National Taiwan University	3
	total	6

Enrollment and the Number of Graduates of Master's Degree & Doctor Degree

Opportunities and challenges

- one of the best quality OT education
- Addition of community-based level II fieldwork to senior year
- Challenges
 - PT moves towards 6-year university degree (2 DPT programs in Taiwan)
 - More OT educational programs, college or graduate level?

9

Professional License Demographics

- According to the Roster of qualified occupational therapists published by Ministry of Health and Welfare and Ministry of Examination (from 1998,09 to now)

Number of qualified members

Occupational therapist	5119
Occupational therapy assistant (License examination had stopped since 2011)	934
Total	6053

• Occupational Therapy Manpower Estimates for Medical Institutions, prepared by Taiwan Occupational Therapy Association & Union of Occupational Therapists, ROC (2016)

10

Professional License Information

- The total Number of licensed members has grown steadily

• Occupational Therapy Manpower Estimates for Medical Institutions, prepared by Taiwan Occupational Therapy Association & Union of Occupational Therapists, ROC (2016)

11

License pass rates in past 10 years

- Keep prudent check to monitor the acquisition of the license

• Occupational Therapy Manpower Estimates for Medical Institutions, prepared by Taiwan Occupational Therapy Association & Union of Occupational Therapists, ROC (2016)

12

Practice areas of Occupational Therapists

Data statistics up to Dec 31th, 2015

	OT	OTA	OT practitioners
Practice in hospital	1916	135	2051
Practice in clinic	578	82	660
Sum up	2496	217	2711

6053?

- OT working in non-medical settings do not need to register, such as day centers, nursing homes, centers of assistive technologies, school, etc.

* Occupational Therapy Manpower Estimates for Medical Institutions, prepared by Taiwan Occupational Therapy Association & Union of Occupational Therapists, ROC (2016)

The total number of licensed occupational therapists and of those registered to practice

- Low reimbursement
- Singular referral source (mostly physiatrist)
- Limited opportunities for career advancement within occupational therapy
- Low requirement re: occupational therapy service for institutional review (about 1 OT per 300 beds in general hospital, per 60-70 beds in psychiatric hospitals)

15

Occupational therapists related population statistics

The number of occupational therapists per 10000 persons	1.1
The number of WFOT-approved schools	7
Population over the age of 60 in 2050 in Taiwan	43.6%

16

Looking forward....

- Changes in environmental demands
 - the “10-year long-term care 2.0” plan and active aging programs to create a senior-friendly environment
 - increasing OTs willing to work in the communities;
 - Uncertainty re: evolution of policies and reimbursement regulations
- Promotion of Post-acute care
 - more OTs working outside of rehabilitation ward
 - Still requires referrals by psychiatrists (rehabilitation doctors)
- Less emphasis on inpatient or residential psychiatric care
 - Less reimbursement for OTs?
- Promotion of OT private practices
 - Mostly in pediatric areas

17

Oral presentation	123
Poster presentation	312
Taiwan-Japan OT Joint Symposium	94
Participants	720

A Presentation on
Professional Occupational Therapy
Education in Hong Kong – An Update 2017

Samuel Chan
Chairperson
HKOTA

**On Behalf of Hong Kong Occupational
Therapy Association,
I thank you for
Japanese Association of Occupational
Therapists'
kind invitation**

Contents of this presentation:

- * **Formal OT Education in HK**
- * **Continuing OT Education in HK**
- * **Envisioned OT Specialty Education in HK**
- * **Soft Education for OTs**

Formal OT Education in
Hong Kong

HK's Formal OT Education (cont'd)

- * The first **formal** OT program (in higher diploma level) was launched in 1978 by the Hong Kong Polytechnics
- * The first Master OT program was launched by the Hong Kong Polytechnic University in 1996
- * The first **Master Entry** OT program was launched also by the Hong Kong Polytechnic University in 2012, second batch in 2014 and the third batch in 2017; M(entry)OT students must possess a first degree in a health related subject in order to be eligible for enrolment into this program

HK's Formal OT Education (cont'd)

- * This Master Entry OT program was entirely financially sponsored by HK's Social Welfare Department (SWD)
- * The aim was to produce a class of 30 OTs (only 24 in 2017 cohort) from time to time merely for NGOs
- * Because NGOs are not able to remunerate OTs a comparable salary package as what Hospital Authority does, their recruitment were always not very successful
- * M(entry)OT graduates' tuition fees are totally covered by SWD, but they need to commit themselves for 2 years (now 3 years) in servicing NGOs as a contractual promise upon graduation

HK's Formal OT Education (cont'd)

- * As a result, such a M(entry)OT program is specially tailor made for producing OT practitioners in a market serving Community Clinical Settings, i.e., NGO settings
- * Because NGO settings are widely diversified and specialty (Paediatric, Psychiatric, Vocational Rehabilitation, SCI, etc.) based; and because NGOs are headed by social workers not always knowledgeable about OT's nature; and because commonly one Setting will just employ one OT, matching M(entry)OT program contents with the specific demands of NGOs for OT clinicians is inevitably a big challenge

HK's Formal OT Education (cont'd)

- * To have such a match, we are to equip these students with following skills:
 - All-round clinical knowledge about diseases and dysfunctions in any particular field
 - All-round clinical skills as well as specialized skills in a particular specialty to carry out effective treatments
 - Proactive marketing skills if he/she is to develop and expand his/her profession in midst of non-OT heads
 - Possession of a very clear, logical and rational mind to help patients formulate their individualized manageable treatment plans
 - Sensitive to all sorts of customers' needs
- * So, what sort of student therapists are we intending to shape?
- * Indeed, a group of supermen and superwomen!

HK's Formal OT Education (cont'd)

Hong Kong Occupational Therapists' Board (OT Board), the statutory professional registration agency, granted TWC recently an approval to its OT program; hence the said graduates can be legitimately registered as Practising OTs in Hong Kong

- * OT Board's accreditation exercise on TWC's OT Program lasted for more than 4 years, we therefore can see that Hong Kong government imposed a stringent surveillance on the quality of local professional training programs

HK's Formal OT Education (cont'd)

- * As mentioned in my previous sharings, the entry academic performance of the students admitted to HKPU's OT program has consecutively been ranked the 2nd highest among all students applying for entry to HKPU
- * This year some newly admitted students (high school leavers) even attained 34 to 36 points in writing HKDSE (Hong Kong Diploma of Secondary Education Examination) which is deemed virtually an university admission open examination in HK
- * In comparison, students admitted to Faculty of Medicine of either Hong Kong University or Chinese University of Hong Kong in average attained 32 DSE points

HK's Formal OT Education (cont'd)

- * The **entry** academic performance of the students admitted to TWC's OT program has been ranked the 1st highest among all students applying for entry to TWC
- * These students in average have attained 25 to 26 DSE points

HK's Formal OT Education (cont'd)

- * One of my observations was that today we have been seeing an increasing societal trend of attracting more high school leavers with higher calibre to study OT
- * Because OT practices are widely diversified; students, irrespective of having interest in physical field of rehabilitation or in mental health, will find a place within our profession to develop individuals' interests
- * This means that OT profession embraces practitioners with heterogeneous talents
- * While many other professions whose practitioners' talents are sort of homogeneous, like Physiotherapists

Continuing OT Education in Hong Kong

Continuing OT Education (cont'd)

On-field OT practitioners have all along been demanding HKOTA to organize more clinical skill training courses for them because of the regression in clinical skills induction in the educational institutes (i.e., in their school days) since apprenticeship mode of education in schools has been foregone

- * To HKOTA, it is a lucrative business helping us generate considerable income
- * Several streams of continuing education are more attractive to OTs in Hong Kong:
 - * Paediatric topics, particularly those pertaining to Sensory Integration
 - * Traditional Chinese Qi Gong that can be integrated in OT's conventional practice, particularly Ba Duan Jin
 - * Alternative therapies

第一式・兩手托天理三焦 舒展脊椎好輕鬆

- 【保健養生作用】
- 具有拉長脊椎、頸肩、擴胸、調理氣血、穩定情緒等功效。經常練習這個動作，可以促進身體各個器官的新陳代謝，並且舒緩脊椎和肩膀的壓力與痠痛。

第二式・左右彎弓似射雕 愛肝顧肺解鬱悶

- 【保健養生作用】
- 調整彎腰駝背的不良姿勢，進而強化呼吸和血液循環，消除身體疲勞，強健腿部肌肉，對於女性還有促進胸部豐滿、美姿美儀的效果。

第三式・調理脾胃須單舉 消化若好人不老！

- 【保健養生作用】
- 本招式具有加強脾胃功能，減緩腸胃疾病不適和胃酸過多的情況，增加腸胃蠕動，排除宿便。

Envisioned OT Specialty Education in Hong Kong

OT Specialty Education

**An envision:
Establishment of the
Hong Kong College of
Occupational Therapists**

OT Specialty Education (cont'd)

- * Setting up of OT College in Hong Kong
- * Background:
 - * This was discussed in 2008, 2010 AGM
 - * Concrete action plan formulated in 2014
 - * Setting up a Provisional HK College of OT in June 2015
 - * Currently the College is subsumed under HKOTA

OT Specialty Education (cont'd) HK College of OT

OT Specialty Education (cont'd) HK College of OT

Eight Identified Specialty Areas:

1. child and adolescent service
2. mental health
3. elderly service
4. medical rehabilitation
5. musculoskeletal rehabilitation
6. work disability management
7. assistive technology
8. learning disability

OT Specialty Education (cont'd) HK College of OT

Milestone	Timeline
Organization Committee for Provisional HK College of OT	June 2015
Preliminary Framework for Consultation	July 2015
Paper on formation of HK College of OT	August 2016
Members consultation	August to September 2016
Invitation of Founder Fellows & Establishment of Specialty Colleges & Provisional OT College	Before December 2016
Invitation of Fellow Application from HKOTA members	January 2017
Vetting of Qualification and Interview	Before June 2017
Confer for 1 st Batch of Fellows & Official Establishment of HK College of OT	July 2017 (Next AGM)
Quotable Qualification Application to HK OT Board	July 2017 onwards

OT Specialty Education (cont'd) Fostering Specialty Groups

1. Paediatric & Convalescent Service

- Continuation on the development of Fine Hand Motor Test which is to be integrated with Handwriting Speed Test for School Students
- Close collaboration with HK Paediatric Foundation & The Boys' & Girls' Club Association to organize HK Healthy Children Competition annually, introducing "ADL March"
- Setting up of an administratively independent Hong Kong Sensory Integration Association, subsumed under governance of HKOTA

OT Specialty Education (cont'd) Fostering Specialty Groups

2. Cross-over of 'Health Qigong cum Traditional Racial Sports Research Group' with 'Work Rehabilitation & Occupational Health'
3. Montessori Methods for Dementia™ (MMD) / DementiAbility Methods: The Montessori Way™ (DMMW)
 - regular workshops held
 - 2nd batch of 'trainers' trained and so HKOTA would have more manpower to help in training to cope with the increasing demand, we have trained almost 100 DMMW practitioners as of today
 - well established collaboration with DementiAbility Enterprise Corporation in Canada
 - the Specialty Group's active participation in providing opinion on Dementia Policy & Service in HK
4. New Special Interest Group in **Housing** been set up and led by an OT Manager working in Housing sector; frequent sharing sessions organized, with close linkage with Architect and Construction industries

PAOT Chapters

Philippine Academy of Occupational Therapists, INC.

OFFICIAL STATEMENT
on the
ESTABLISHMENT OF CHAPTERS
(to be read at a position statement in the upcoming
52nd OF National Convention on November 2017)

The Philippine Academy of Occupational Therapists, Inc. (PAOT, Inc.) recognizes the increasing number of Filipino occupational therapists coming from different regions/communities in the country and other countries and their drive to promote, safeguard and develop the occupational therapy profession in the Philippines. To create a united, goal-directed, systematic, and sustainable relationship/philosophy with Filipino occupational therapists, PAOT, Inc. encourages the establishment of chapters, one area at a time.

PAOT, Inc. welcomes groups of occupational therapists that have the sincere desire to organize a chapter in a specific area, and consequently be responsive to the local AND national needs of the profession as well as the **Filipino OT Healthcare**. This has been and will consistently be the PAOT, Inc. (formerly OFAP Inc.) vision-mission since 1968. PAOT, Inc. shall accredit each chapter, and the establishment of each chapter shall be guided by the PAOT Guidelines on the Institution and Governance of Chapters.

With the establishment of chapters, PAOT, Inc. views that, together, we can achieve the goal of having one occupational therapist per 20,000 Filipinos by 2025.

BOARD OFFICERS
Philippine Academy of Occupational Therapists, Inc.
September 1, 2017

SAMAL ISLAND

PAOT-MINDANAO CHAPTER PRE-CONVENTION
October 27-28, 2017

Philippine Health Insurance Corporation

PhilHealth
Your Partner in Health

- created in 1995 to implement universal health coverage
- benefit package to support children with hearing, visual, mobility impairment and development disability
- 30 sessions per year in contracted facilities

Philippine Academy of Occupational Therapists, INC.

Philippine Wheelchair Service Providers

Philippine Society of Wheelchair Professionals
-2015-

- teaching and promoting WHO wheelchair service training package
- identified professionals involved in wheelchair provision

Philippine Academy of Occupational Therapists, INC.

Department of Health

- human resource health study
- health and wellness program for persons with disabilities
- senior citizen national program strategic planning

Philippine Academy of Occupational Therapists, INC.

Philippine Academy of Occupational Therapists, INC.

Disaster Risk Reduction and Response Committee

Philippine Academy of Occupational Therapists, INC.

Philippine Academy of Occupational Therapists, INC.

FACULTY DEVELOPMENT /CURRICULUM DEVELOPMENT

Commission on Higher Education

- part of the technical committee that formulated and will be monitoring implementation of OBE

52nd Annual Convention

- faculty summit because of OBE
- problem of OBE implementation in fieldwork sites which are not necessarily academe

RESEARCH

Research

- research sub – committee
- revival of PJOT

PROFESSIONAL LEGISLATION

Philippine Occupational Therapy Law

- Philippine Physical and Occupational Therapy Law
- Republic Act 5680
- 21 June 1969

OT Technician

- Education – 2 years of college (minimum of 60 units completed) preferably from related field
 - Ratio – 1 OTRP : 4 OT Technicians
 - Basic Skills
 - Formal training and Assessment
 - Basic competency
 - Foundation skills
 - Supervision – direct, onsite and daily contact
 - OT with at least 2 years of experience
- as an OTRP with OBCE training

DIVERSIFICATION OF PRACTICE

Areas of Practice

Certification Course

- Dynamic and Postural Reflex Integration Course
- Upper Limb and Manual Skills Integration Course

2017 National Occupational Therapy Conference

<http://notc.com.sg/2017/>

- **3 – 4 November**
- **Enabling Occupations Beyond Borders**
 - OT in primary care and care integration
- **Keynote: Occupational Therapy and Primary Care: Expanding Boundaries**
Dr. Catherine Donnelly, Canada
- **Plenary: Enabling Occupations Beyond Borders: Occupational Therapy and Coaching**
Dr Fiona Graham, New Zealand

Singapore Association of Occupational Therapists

Key Developments since last meeting in 2016

- By end of 2017, Occupational Therapists will be able to refer and renew clients attendance at community based day rehabilitation centres
 - Release of government subvention
- Collaboration with MOH on “direct subsidy referrals without specialist referrals in public health care”
- Formal education for therapy assistants will be launched in 2018
- Allied Health Professions Council will release guideline on supervision and duties on therapy support staff

Occupational Therapy Education in Singapore

Overseas Undergraduate & Post-Graduate Scholarships

- Up to 5 annual for undergraduate degree in OT in selected universities in Australia, UK and Ireland
 - 5 Year Government Bond
- Masters and PhD Scholarship in selected universities in Australia, Canada, Hong Kong, UK, USA and Europe

Nanyang Polytechnic DipOT + 1 Year Bachelors

- As of 2016, 615 practicing occupational therapists with local and culturally relevant education with one year overseas educational experience
- 57.6% of Singaporean and Permanent Residents educated in this scheme
- Forms 57.6% of OT population
- Last graduates in 2019

Singapore Institute of Technology

- Singapore's newest public university
- 4 year full time Bachelor of Science in Occupational Therapy with Honours degree
- First intake of 60 students in 2016 with first graduates in 2020
- Remains Singapore's only occupational therapy educational programme superceding Nanyang Polytechnic's Diploma in Occupational Therapy + 1 year Bachelors programme
- Second intake in September 2017 with 85 students
- Third intake in September 2018 proposed to be 105 students

Practice Fieldwork Education

Total Duration: 30 weeks, 5 Sessions

Session	Period	Est Date	Duration	Learning
1.	Y1 T3	Mid Jun	2 Weeks	Introduction + Observation
2.	Y2 T3	Early Jul	7 Weeks	Students will be assigned for the following placements:
3.	Y3 T2	Mid Feb	7 Weeks	1. Acute Hospital
4.	Y3 T3	Early May	7 Weeks	2. Step-down/Community Based
5.	Y4 T1	Early Sep	7 Weeks	3. Psychosocial / Mental Health
				4. Developmental Disability
				5. Role Emerging ^{1 2}
				6. International Placement ^{1 2}

¹ Students allowed to opt for this from Year 3 onwards.

² Students can do a maximum of only one block from this category.

Singapore Association of Occupational Therapists

Ask a question at slido.com #3762

Fieldwork Supervision

- All supervisors undertake a one day course
- Must pass the Objective Structured Practical Examination
- Accredited to supervise
- Pre-Employment Clinical Training (PECT) Funded
 - Increased from SGD\$ 150 (USD 110) to SGD\$ 207 (USD 150) per student per clinical training day
 - SGD\$ 7245 (USD 5313) for a 7 week block placement
- Students assessed using Student Practice Evaluation Form – Revised (On-line)

Singapore Association of Occupational Therapists

Admissions Criteria

Academic Results

- **A-Levels:** A good pass in two of the following H2 subjects: Biology, Chemistry, Physics and Mathematics.
- **Polytechnics:** An approved diploma from a polytechnic in Singapore. Exemption will be considered on a case-by-case basis.
- **International Baccalaureate:** A good pass in two of the following: HL Mathematics, HL Chemistry, HL Biology and HL Physics.
- **NUS High School Diploma:** Major CAP of at least 2.5 in two of the following: Biology, Chemistry, Physics and Mathematics.

Medical Examination

Multiple Mini-Interviews

- Ethical decision making 道德守则
- Critical thinking 关键思维
- General knowledge in healthcare services in Singapore 相关医疗知识
- Level of co-curriculum activities involvement 课外活动
- Communication skills 表达能力
- Suitability/passion for discipline 热忱

Findings: Significant Reduction in Negative Attitude

Multidimensional Attitudes Scale Toward Persons with Disabilities – MAS (Findler, Vilchinsky and Werner, 2007)

- Students has relatively low negative attitudes during Pre Test
- Significant reduction in negative attitudes towards Persons with Disabilities in Post test

OT DREEM (Dundee Ready Education Environment Measure) Scores

	DREEM Overall Scores	Students' Perception of Learning	Students' Perception of Teachers	Students' Academic Self Perceptions	Students' Perception of Atmosphere	Students' Social Perceptions
Mean	146.9825	35.6667	34.9825	22.3860	34.7719	19.1754

NYP First Year = 145.76

DREEM overall scores: 146.98
0-50 Very Poor
51-100 Plenty of Problems
101-150 More Positive than Negative
151-200 Excellent

Students' Perception of Learning: 35.67

0-12 Very Poor
13-24 Teaching is viewed negatively
25-36 A more positive perception
37-48 Teaching highly thought of

Students' Perception of Teachers: 34.98

0-11 Abysmal
12-22 In need of some retraining
23-33 Moving in the right direction
34-44 Model teachers

Students' Academic Self Perceptions: 22.39

0-8 Feelings of total failure
9-16 Many negative aspects
17-24 Feeling more on the positive side
25-32 Confident

Students' Perception of Atmosphere: 34.77

0-12 A terrible environment
13-24 There are many issues which need changing
25-36 A more positive attitude
37-48 A good feeling overall

Students' Social Self Perceptions: 19.18

0-7 Miserable
8-14 Not a nice place
15-21 Not too bad
22-28 Very good socially

OT Education in Singapore: Challenges

- Transition
 - Closing one course
 - Starting another
 - Comparisons
 - Renewing partnerships
 - Time of re-invention
- Rapid increase in student intake
 - Resource challenges
- Students must reconcile curriculum aspirations with reality
- Expectations that graduates can support and contribute to developing new programmes
- Encouraging graduates to enter community based practice

OTs from Singapore's Eastern Health Cluster
St Andrew's Community Hospital + Changi General Hospital +
Peacehaven Nursing Home

OT Education in Singapore: Post-graduate

- Graduate Entry Masters?
 - Competencies nurtured through 4 year programme compressed into 2 years
- Entry route for therapy assistants?
- Masters in Occupational Therapy?
- Local PhD?

OTs from Jurong Community Hospital
at Community Screening Event for Dementia

Possible Solutions

- Funding
- Refining Career Tracks
 - Speciality (? College of OT)
- Promoting enterprise
- Shared Narrative
 - Creating a community
- Leadership & Mentoring
 - Intra-disciplinary (Within)
 - Inter-disciplinary (With Others)

Singapore Association of Occupational Therapists

Mentoring Future Leaders

- Increased in number of OT > 5 years experience
- Mentoring leaders grounded in practice and leading services
- Leaders in Community Practice
 - National Council of Social Service

Singapore Association of Occupational Therapists

International section,
Japanese Association of Occupational Therapists
