Notes and Cautions

Not all organisations collate data that is requested for this project.

Missing data should not be interpreted as being not applicable; in some instances the information is not known or unable to be provided.

All responses were requested in English and therefore reliant on accurate translations by Member Organisations.

Each slide shows the responses that were received from each WFOT Member Organisation or the WFOT Delegate.

Figures shown may be approximate versus an exact number.

Slides 40 and 41 (check on final version) required Member Organisations to provide responses expressed as a percentage. Not all combined responses equal 100%
